

BUZZ FROM THE HIVE

Welcome to the wonderfully sweet world of honeybees! The Bee Cause Project is excited to bring the wonder and inspiration of nature into everyday life through the installation of observation hives.

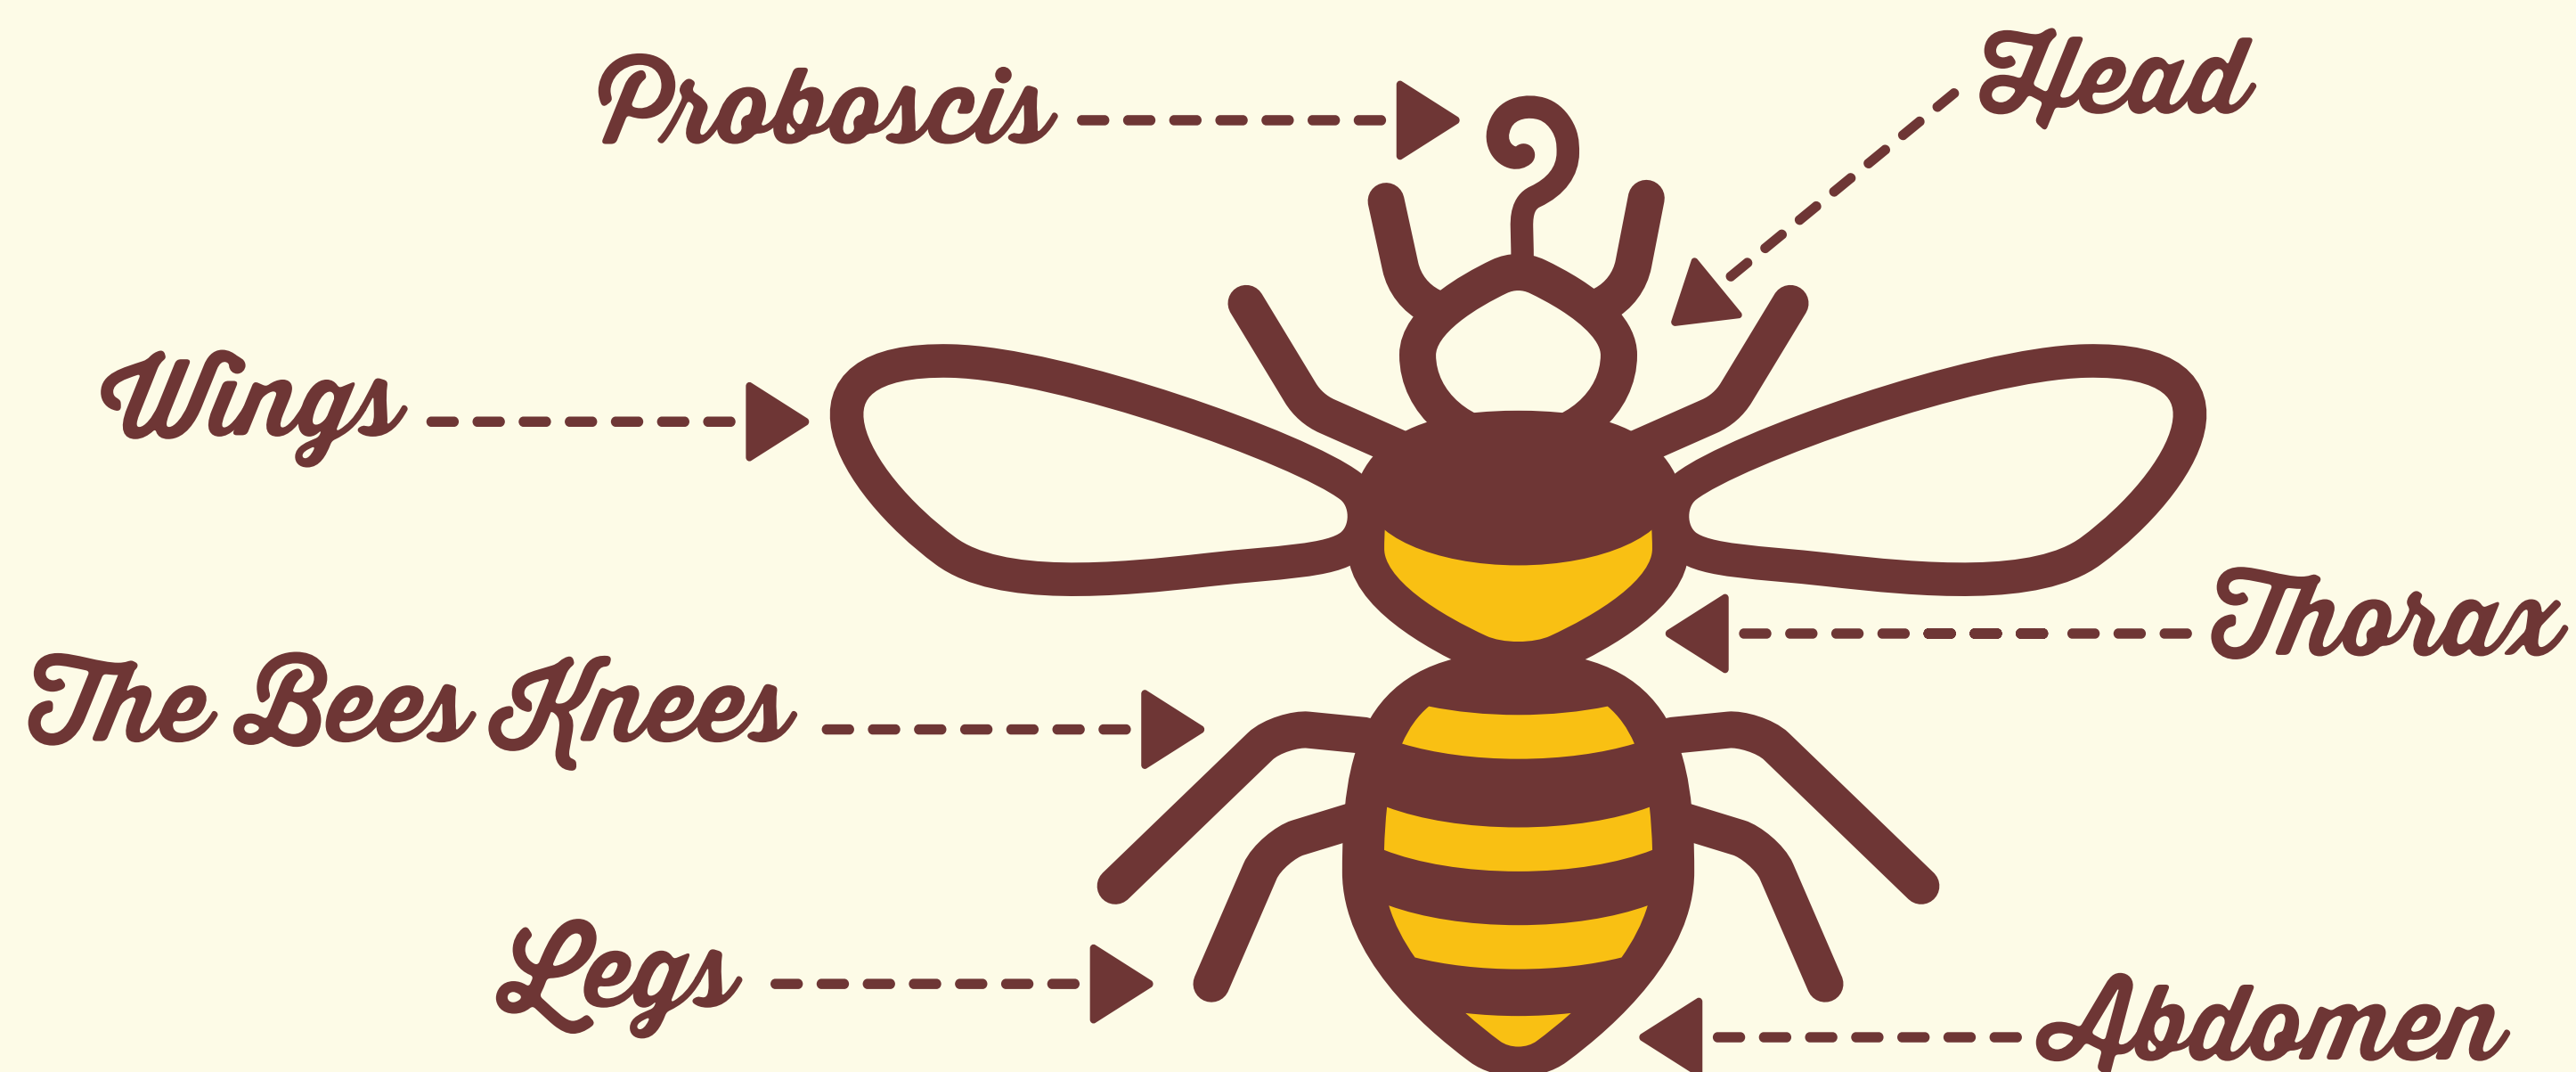

Did you know there are 25,000 bees in our hives?

A CLOSER LOOK

"Bees live as people should live: naturally, symbiotically, and in a manner that only contributes positively to the world around them." - Ted Dennard, Founder of Bee Cause

Check out this diagram to help you identify honey bees.

ARE YOU BUZZING WITH EXCITEMENT ABOUT BEES?

The Bee Cause Project wants to ensure future generations understand, engage, and respect the natural environment while developing the science, technology, engineering, art, and math skills necessary to act as stewards of the earth. To do this, we need your help. Sponsor a hive, provide beekeeping support, volunteer as a bee advocate, or apply to have a hive for your school or office!
